SUMMARY

Michael is an energetic and highly dependable Software Developer that loves to build things and solve problems. He uses the following technologies in his projects: JavaScript, React, Firebase, AWS, Express, Redux, MongoDB, SQL/SQL Server, Node.js, CSS and HTML. He is an effective, process-driven developer who is passionate about creating meaningful User Interfaces that businesses and their end users enjoy. Michael highly values collaboration and is an effective communicator of technical terms within all organizational areas. An enthusiastic problem solver with demonstrated experience contributing to and leading cross-functional teams.

EXPERIENCE

WEB INK

Austin, TX

Role: Software Developer / Sole Proprietor

3/18-Present

- Transitioning an application to be web-based and software as a service for an educational consulting company that is used in classrooms K-12 in multiple school districts in the state of TX
- Development of dashboard, modals and features of the front-end using JavaScript, React.js, and CSS
- Sending and storing data (users, games, passwords) with express, node and MongoDB
- In May 2019 I was fortunate enough to use the current version of the app live with classrooms in Ecuador demonstrating the applications ease of use and impactfulness in the classroom

VersaSuite EHR and HR

Austin, TX

Role: Software Developer

11/18-6/19

- Create meaningful dashboards, modules and features for patients and care providers using JavaScript, React and multiple libraries to maximize user experience through thoughtful placement of components and modules
- Utilize RESTful APIs with ASP.net (C#) models and controllers to communicate with our SQL/ SQL Server Db
- Build reusable components whenever possible that allow users to perform and/or see a multitude of tasks or file types
- I was asked to be project manager after 5 weeks in the role due to dependability and past business experience leading projects and teams (while I am an informal leader my focus is to become a better developer)
- Demo and present our web applications to clients, collect feedback and implement changes

AUSTIN CODING ACADEMY

Austin, TX

Role: Tutor and Affiliate

10/18- Present

- Provide individual and small group tutoring, study sessions and encouragement to students of Austin Coding Academy where we talk through and write code in JavaScript, HTML, CSS and collaborate using GitHub
- Assist students in improving academic achievement by meeting with them to clarify learning objectives and help with understanding of concepts of programming
- ACA was my first live course introduction to programming and now I am helping them as a tutor

Shanghai Zhuozan Education & Technology Co.,Ltd (Teaching Abroad and Virtual Classroom)

Remote &

Abroad

Roles: ESL Instructor, English Teacher

8/16-10/18

- Develop interactive lessons utilizing technology, enabling students to understand and use English both inside the classroom and in their daily lives
- Create daily lesson plans, materials, and assessments to develop ESL central areas: grammar syntax, listening, reading, speaking and writing
- Participate in planning and training sessions for classroom technology integration

- Research and design development plans for children and adult learners ranging from Beginner Level through Business English and TOEFL preparation

USAA
